

I would like to comment on how important KLOVE is to me and my family. If you allow the low power FM to expand and get priority over the current FM translators we will most likely not be able to hear our favorite KLOVE station which is broadcast by translator. Please reconsider this decision because KLOVE is important to not only our family but others in our small community. It is a positive music alternative for our local community. We would not be connected to others who enjoy the same music all over the nation. It would not be possible for my teenager to find the same quality music locally. My children and their friends really rely on KLOVE and AIR1 to provide for them their music and if you do not allow the FM translators to stay in the same priority on the airwaves it would be a detriment to their social, emotional, and spiritual lives. The Teater family would like to ask you to keep the translators at their same level of output and priority.

Thank you,
Becky Teater and family
